LOTR LCG ERRATA AND FAQ

- Passage Through Mirkwood -

- **Caught in a Web**
  - Q: How does a player resolve the situation in which a single hero has multiple copies of Caught in a Web attached?
  - A: The player must pay for each copy of Caught in a Web before the hero can ready. Each copy of the card creates an independent condition that must be fulfilled before readying the attached hero, so if each condition is not fulfilled the hero cannot ready. End result, if a hero has two copies of Caught in a Web attached, the player will have to pay 4 resources from that hero's resource pool in order to ready the card.
- **Chieftain Ufthak**
  - Q: When do "after this enemy attacks" Forced effects like those on Chieftain Ufthak and Wargs resolve?
  - A: These effects resolve immediately after step 4 of enemy attack resolution.
- **Dol Guldur Beastmaster**
  - Should read: "**Forced**: *When* Dol Guldur Beastmaster attacks…"
  - The additional shadow card is dealt when the Dol Guldur Beastmaster is chosen during step 1 of enemy attack resolution.
- **Passage Through Mirkwood (campaign card)**
  - Should have the Passage Through Mirkwood encounter set icon.

- Journey Down the Aunduin -

- **Banks of the Anduin**
  - Q: What happens to Banks of the Anduin if it is drawn as a Shadow card.
  - A: It will be discarded from play at the end of the combat phase, like other Shadow cards. When a card is drawn as a Shadow card, only its Shadow text is considered to be active.
- **Journey Down the Anduin (campaign card)**
  - Should have the Journey Down the Anduin encounter set icon.
- **Treachurous Fog**
  - Q: If a location is revealed after Treacherous Fog was revealed during the same quest phase, does the revealed location get +1 threat from the "When Revealed" effect on Treacherous Fog?
  - A: Yes. The "When Revealed" effect on Treacherous Fog creates a lasting effect until the end of the phase that affects each location in the staging area. This is different from Driven by Shadow which uses the language "currently in the staging area" when it is revealed and only affects enemies and locations in the staging area at the time it is revealed.
- **Wargs**
  - See "Chieftain Ufthak" above.

- Escape from Dol Guldur -

- **Dungeon Jailer**
  - Q: Does Dungeon Jailer shuffle guarded objectives back into the encounter deck?
  - A: Yes. Dungeon Jailer will shuffle any unclaimed objective, whether or not it is guarded.

- **Dungeon Torch**
    - Q: Does a player with the Dungeon Torch raise his threat by 2 or 3 during the refresh phase?
    - A: Dungeon Torch's effect does not replace the regular 1 threat raise, but adds to it. So the player with the Dungeon Torch raises his threat by 3.
- **Escape from Dol Guldur (campaign card)**
    - Should have the Escape from Dol Guldur encounter set icon.
    - If playing The Dark of Mirkwood campaign as an extension to the Mirkwood Paths campaign, it can be unclear about what to do with Mendor if he survived. The Escape from Dol Guldur campaign card states that he gets added to the campaign pool and the Mirkwood Paths instructions say to carry forward the campaign pool. Therefore, if we read this literally, Mendor will remain for The Dark of Mirkwood. He will also remain for the next campaign after The Dark of Mirkwood because the Escape from Dol Guldur campaign card also states that Mendor will get put into play at the start of each scenario during your *next* campaign.
- **Nazgûl of Dol Guldur**
    - Should have the text: "No attachments can be played on Nazgûl of Dol Guldur."
    - Q: If I cancel the Shadow effect on a card dealt to the Nazgûl of Dol Guldur, is the effect still considered to have resolved, making me discard a character?
    - A: No. Resolving an effect means that the effect triggered and resolved to the fullest extent possible. Canceling the effect will prevent the Nazgûl of Dol Guldur's ability from triggering, just as if the card had no Shadow effect to begin with.
- **Out of the Dungeons**
    - If a facedown Orc Guard would be returned to the staging area, it is instead placed in its owner's discard pile.
    - Q: If all of a player's heroes (except for the captured hero) are destroyed during the Escape from Dol Guldur scenario, is that player eliminated from the game?
    - A: Yes, the player is eliminated, and the players (as a group) have lost.
- **The Necromancer's Tower**
    - Should read: "...*reveal* and place them in the staging area."
    - Q: During the Setup for stage 1A of The Necromancer's Tower, should each objective have one encounter card attached to it, or two?
    - A: One. When you reveal a Guarded objective, you must reveal the top of the encounter deck and attach it to that objective, guarding it. The additional instruction on The Necromancer's Tower to "...attach 1 encounter to each objective card" is there as a reminder, so that the players know to attach 1 encounter card to each Guarded objective.
- **Tower Gate**
    - Q: Do the Orc Guards generated by the effects of the Tower Gate location card and the Out of the Dungeons quest card have the Orc Trait?
    - A: No. Face down cards do not have traits unless the trait is gained through a card effect.
- **Treachurous Fog**
    - Q: If a location is revealed after Treacherous Fog was revealed during the same quest phase, does the revealed location get +1 threat from the "When Revealed" effect on Treacherous Fog?
    - A: Yes. The "When Revealed" effect on Treacherous Fog creates a lasting effect until the end of the phase that affects each location in the staging area. This is different from Driven by Shadow which uses the language "currently in the staging area" when it is revealed and only affects enemies and locations in the staging area at the time it is revealed.

- Conflict at the Carrock -

- **Against the Trolls**
    - Q: Is Against the Trolls the final stage of Conflict at the Carrock?
    - A: Yes.
- **Sacked!**
    - Q: If a Sacked! card is placed on a hero while that hero is questing, is that hero removed from the quest?
    - A: No. Sacked! specifies only that the hero cannot commit to the quest, and the hero is already committed. However, the hero cannot commit to quests on future round while Sacked! is attached.

- A Journey to Rhosgobel -

- **Return to Rhosgobel**
    - Q: Wilyador cannot be healed of more than 5 wounds by a single effect, so how do I resolve the “when revealed” text on Return to Rhosgobel 3B?
    - A: Heal 5 wounds from Wilyador for each Athelas objective card as its own separate action.

- The Hills of Emyn Muil -

- **Amon Lhaw**
    - Q: Are attachments already in play discarded when Amon Lhaw becomes the active location?
    - A: No. Attachments only check play restrictions when entering play. Attachments already in play will stay attached.

- The Redhorn Gate -

- **Bitter Wind**
    - Q: If I can’t discard 3 resources from all of my heroes due to Bitter Wind, do I have to partially fulfill the effect?
    - A: Yes, players should resolve as much of any “discard” effect as they are able to.
- **Caradhras**
    - Q: If Caradhras is in my victory display when I complete stage 2 of The Redhorn Gate, will it become the active location even though it is not in play?
    - A: Yes. You will remove Caradhras from your victory display and put it back into play as the active location. Cards in the victory display are not removed from the game and can still be referenced by effects. If players get too far ahead of themselves via card effects, they’ll find a return journey is necessary!
- **Snow Warg**
    - Should read: “**Forced**: After a character is declared as a defender against Snow Warg…”

- The Watcher in the Water -

- **The Watcher**
    - Q: Can I use Son of Arnor to engage The Watcher, even though The Watcher reads "...cannot be optionally engaged"?
    - A: Yes. The ability on Son of Arnor does not count as optionally engaging The Watcher. Optional engagement only occurs during step 1 of the Encounter phase.

- The Long Dark -

- **Rules Sheet**
    - Incorrectly mentions the Hazards of the Pit encounter set instead of the Deeps of Moria encounter set. The encounter set icons on the quest cards are correct.

- Foundations of Stone -

- **Below the Mines/Sheltered Rocks**
    - Q: When players have separate staging areas at stage 4 of Foundations of Stone, can there be multiple copies of unique cards in play?
    - A: No. Players must still respect the rules for playing unique cards when they are split up. For example, if a player has Gandalf in play, then no other player can play Gandalf.
- **Lost and Alone**
    - Q: How does the card Lost and Alone work? What if the hero gets attached to a Nameless Thing or was my last hero in play?
    - A: You only put the lost hero back into play if you draw the hero, whether during the resource phase or through a card effect. If the hero is discarded or attached to a card like a Nameless Thing, then treat it like any other card. In the latter situation, the value of the hero would be null, since it has no printed cost. If your last hero gets shuffled into your deck you are not eliminated from the game; heroes are not considered to be killed unless they are in your discard pile. You will continue playing until you either draw the hero, are eliminated through other means, or the game ends.
- **Nameless Thing**
    - Q: If a card is attached to Nameless Thing as part of the resolution of its Forced effect, is that card's game text active?
    - A: No. Cards that are attached to nameless Thing as a result of triggering its Forced effect are considered attachments with no card title or game text. The only active part of the attached card is its cast.
- **Rules Sheet**
    - Incorrectly mentions the Deeps of Moria encounter set instead of the Hazards of the Pit encounter set. The encounter set icons on the quest cards are correct.

- Into Ithilien -

- **Blocking Wargs**
    - Should read: "Surge. **When Revealed**: Deal 1 damage to each character committed to the quest." Omit the parenthetical.

- The Siege of Cair Andros -

- **The Power of Mordor**
    - Should read: "...Reveal an equal number of cards from the encounter deck…" Omit the word "Then".

- The Steward's Fear -

- **False Lead**
    - Q: After False Lead is revealed and its effect resolves, do the players continue staging?
    - A: No. The quest phase ends immediately and the players do not continue staging.

- Assault on Osgiliath -

- **Counter-attack**
    - Should read: "**When Revealed**: Each player must *either* return the location he controls…"

- The Blood of Gondor -

- **The Ambush**
    - Should read: "At the beginning of the combat phase, each player must *either* turn each of his hidden cards faceup, or take 1 hidden card."
    - Q: When playing The Blood of Gondor, if a card effect such as stage 1B of The Ambush or Lying in Wait turns each of my hidden cards faceup, and one of those cards forces me to take another hidden card, do I have to turn that card faceup as well?
    - A: No. When you are instructed to turn each of your hidden cards faceup, only the hidden cards that are currently in front of you at that time are turned faceup; any hidden cards you are forced to take as part of that effect, such as from Evil Crow, remain facedown in front of you.
- **The Cross-roads**
    - Should read: "The current quest card gains siege *(and loses battle)*."

- The Morgul Vale -

- **Impenetrable Fog**
    - Should read: "**When Revealed**: The first player *either* places 3 progress tokens on To the Tower, or…"
- **Morgul Sorcerer**
    - Should read: "**Shadow**: Defending player must *either* place 1 progress token on To The Tower, or treat this attack as undefended."

- Intruders in Chetwood -

- **Iârion**
    - Should have the uniqueness symbol before the card name.
- **Iârion's Pendant**
    - Should read: "*Attach to a character*. Attached character gets +1 willpower."

- **Intruders in Chetwood (campaign card)**
    - Should read: “The Amarthiul hero cannot be used until indicated by a campaign card.”
- **Rules Sheet**
    - Regarding the Encounter keyword, each player can *set aside up to 3 copies of each player card with the Encounter keyword*, as opposed to before when each player could only set aside 3 player cards with the Encounter keyword in total.

- The Weather Hills -

- **Mysterious Omens**
    - Should read: “**Forced**: When Mysterious Omens is defeated, remove it from the Campaign Pool. Then, each player may choose 1 of the following boons and attach it to a hero they control: Cunning, Hardy, Resolute, Ruthless, or Stalwart. *The players have earned those boons and add them to the Campaign Pool.*”
- **The Weather Hills (campaign card)**
    - Should read: “Add the Mysterious Omens side quest to the Campaign *Pool* and shuffle it into the encounter deck.”

- Deadmen’s Dike -

- **Thaurdir**
    - Should read: “Cannot have *player* attachments.”

- The Battle of Carn Dûm -

- **The Battle of Carn Dûm (campaign card)**
    - Should read: “**Resolution**: Note the amount of damage on each hero at the end of the game *in the Campaign Log*.”

- The Grey Havens/The Dream-Chaser Expansion -

- **Enemy Ships**
    - Should read: “Cannot have *player* attachments.”

- Voyage Across Belegaer -

- **Voyage Across Belegaer (campaign card)**
    - Should read: “The Na’asiyah hero cannot be used in scenarios 1 through 7.”

- The Thing in the Depths -

- **Helm of the Stormcaller**
    - Should have 2 printed threat (not X).
    - Should read: “Helm of the Stormcaller gets +1 quest point for each resource token on a Raider enemy in play.”

- The City of Corsairs -

- **Fate of the Dream-chaser (side 2A)**
    - Should read: "**When Revealed**: Each player assigns damage among non-***Ship*** characters he controls equal to the total damage on each ***Ship*** objective he controls. Discard all *shadow cards*, ***Ship*** enemies, ***Ship*** objectives, and ***Ocean*** locations in play."

- The Long Arm of Mordor -

- **Uruk Chieftain**
    - His ability will cause him to engage a player even if there are no other orcs in play.

- Journey Up the Anduin -

- **Journey Up the Anduin (campaign card)**
    - Should read: "Haldan cannot be used as a hero in this campaign."

- Roam Across Rhovanion -

- **All Quest Cards**
    - Should have the Lost in Wilderland encounter set icon, not the Gathering Gloom icon. (The correct icons are on the rules sheet.)

- Mount Gundabad -

- **Rules Sheet**
    - Should read: "Quest cards are not flipped to side B immediately when revealed. Rather, the current quest card is flipped at the beginning of the quest phase."
    - Should read: "To create the Caves deck, take Dagnir's Hoard and Throat of the Mountain, plus each card from the Lost Caves encounter set, and shuffle them together."

- The Fate of Wilderland -

- **The Goblins' Assault/The Heroes' Defense**
    - Should have The Fate of Wilderland scenario name (instead of Mount Gundabad).

- The Massing at Osgiliath -

- **Pelennor Fields**
    - Q: If there are two copies of Pelennor Fields in the staging area and I travel to one of them, do I still have to raise my threat by 3? What if I have the opportunity to travel to neither of them?
    - A: If a card is self-referential, it refers only to that copy of itself. So if you travel to one copy of the Pelennor Fields, the other copy will raise your threat by 3 because it only takes into account whether you traveled to that particular copy of the Pelennor Fields. So if you travel to neither copy, they both resolve and you must raise your threat by 6.

- The Stone of Erech -

- **The Lord of the Dead**
    - Q: If I am engaged with The Lord of the Dead when I play Saruman, do I still have to raise each player's threat for his Doomed 3?
    - A: No. The moment Saruman enters play under your control, the passive effect on The Lord of the Dead causes you to treat his text box as blank, before the Doomed keyword can trigger.

- Attack on Dol Guldur -

- **Attack on Dol Guldur (campaign cards)**
    - Note that you do not need to defeat all 4 ***Lieutenants*** in order to win. However, unlike in solo, you will need to defeat more than one in epic multiplayer mode.
- **Assault on the Golden Wood**
    - Q: What is the difference between a "group" and a "team"?
    - A: "Group" refers to the 3-12 players who are participating in the event together. "Team" refers to the 1-4 players at the same stage.
    - Q: What does it mean for a card to be "in a victory display"?
    - A: A card is in a victory display if it is in the victory display of any team in your group.
- **Crossing the Anduin (side 2A)**
    - Note that stage 2A says to *discard* Power of Lorien if not claimed. It is not removed from the game. This means that if it's revealed later, it will simply sit in the staging area.

- The Siege of Annuminas -

- **Dúnedain of Annúminas**
    - Q: When the first player takes control of a Dúnedain of Annúminas at stage 1, does he resolve its "when revealed" effect?
    - A: No.
    - Q: What happens when a Dúnedain of Annúminas is destroyed?
    - A: It is placed in the encounter deck discard pile.
- **Rebuild the Defenses**
    - Q: Does damage on an enemy remain on that enemy when it moves to a different stage?
    - A: Yes.
    - See "Attack on Dol Guldur" above for more epic multiplayer rulings.

- The Oath -

- **Obsidian Arrows**
    - Should read: "**When Revealed**: Deal 2 damage to a character *controlled by the first player*."
- **The Oath (campaign card)**
    - Should read: "**Forced**: At the end of each round, place 1 resource token here."

- We Must Away, Ere Break of Day -

- **Troll Key**
    - Should read: “If Troll Key is discarded, add it to the staging area. If the Troll Key is unattached and in the staging area, attach it to a ***Troll*** enemy, if able.”
- **Troll Purse**
    - Should read: “If Troll Purse is discarded, add it to the staging area. If Troll Purse is unattached and in the staging area, attach it to a ***Troll*** enemy, if able.”

- Dungeons Deep and Caverns Dim -

- **Riddles in the Dark**
    - Q: While attempting to answer a Riddle in the Scenario Dungeons Deep and Caverns Dim, when can players take actions?
    - A: Players can take actions after step 2, before step 3.

- Flies and Spiders -

- **Crazy Cob**
    - Q: If there are no characters with poison attached when Crazy Cob is revealed from the encounter deck, does it still make an attack?
    - A: Yes. Since each character has 0 poison, the first player will choose which character Crazy Cob attacks.
- **Lost in the Dark**
    - Should read: “**When Revealed**: Reveal stage 3 and create a separate staging area for the first player using that stage. If there are no other players in the game, discard this stage and each card in its staging area. All other players advance to stage 4.”

- The Lonely Mountain -

- **Secret Entrance**
    - Should read: “Then, look at the top card of the encounter deck. If the looked at card is not…”
- **The Burglar’s Turn**
    - Q: While making a Burgle attempt in The Lonely Mountain scenario, when can players take actions?
    - A: Players can take actions after step 2, before step 3.

- A Shadow of the Past -

- **All Quest Cards**
    - Should read: “When a player fails a Hide test, each ***Nazgûl*** enemy not engaged with a player (including any still being revealed) engages that player.”
- **Gandalf’s Delay**
    - Should read: “Skip the draw cards step during the first round of the game.”

- Fog on the Barrow Downs -

- **Trapped Inside a Barrow (side 4B)**
    - Should read: "**Forced**: After a player at this stage is eliminated, place 1 progress on a Great Barrow at stage 3B."

- Journey in the Dark -

- **Doom, Doom, Doom**
    - Should read: "**Forced**: At the end of the quest phase, remove 1 damage token from Doom, Doom, Doom. *If* there are no damage tokens here, add The Balrog to the staging area." Omit "then".
- **Mines of Moria**
    - Q: If Mines of Moria is in the staging area and there is an active location, where is progress placed first?
    - A: Progress must be placed on the Mines of Moria in the staging area before it can be placed on the active location because the game text on Mines of Moria overrides the game rules via the Golden Rule.
- **The Balrog**
    - Q: How many keywords does The Balrog have?
    - A: One. Indestructible is the only keyword on The Balrog.

- Helm's Deep -

- **Devilry of Saruman**
    - Should read: "**When Revealed**: Place 3 progress on the *main* quest…"

- The Passage of the Marshes -

- **The Passage of the Marshes (campaign card)**
    - Should read: "**Setup**: Each player may change hero cards he controls without incurring the +1 threat penalty. Each player shuffles 1 copy…"

- The Black Gate Opens -

- **The Black Gate Opens (campaign card)**
    - Should read: If the players control Gwaihir, add him to the campaign pool."

- Player Cards -

- **A Burning Brand**
    - Should read: “Restricted. **Response**: Exhaust A Burning Brand to cancel a shadow effect just triggered during an attack that attached character is defending.”
- **A Good Harvest**
    - Q: Can I use A Good Harvest to play a 0 cost card without a resource match?
    - A: No. A Good Harvest only allows you to spend resources for the named sphere, a resource match is still needed to play cards with no resource cost.
- **A Watchful Peace**
    - Should read: “**Response**: After a location worth no victory points leaves play as an explored location…”
- **Beravor**
    - Should read: “**Action**: Exhaust Beravor to choose a player. That player draws 2 cards. Limit once per round.”
- **Blade of Gondolin**
    - Q: If Legolas has a Blade of Gondolin and destroys an enemy, can he trigger his response, finish off a quest card, and still place progress tokens on the next quest with the Blade of Gondolin’s response?
    - A: Yes. Quest cards are immediately replaced as soon as players place enough progress on them, and this replacement does not interrupt the current round sequence. If the current quest card only needs 1 progress on it, then a player could also trigger the Blade’s effect first, and then Legolas’ in order to maximize the number of progress tokens placed. (There is no carry-over progress from an effect).
- **Blue Mountain Trader**
    - Should read: “Then, that player moves 1 resource from the resource pool of a hero he controls to the resource pool of a hero you control, or Blue Mountain Trader is discarded. (Limit once per round.)”
- **Boromir (tactics hero)**
    - Should read: “Raise your threat by 1 to ready Boromir. (Limit once per phase.)”
- **Brand son of Bain**
    - Q: Can Brand son of Bain trigger his response if he participates in a ranged attack that defeats an enemy engaged with another player instead of declaring the attack himself?
    - A: Yes. Declaring an attack and participating in an attack are both subsets of attacking. In both cases, Brand attacks and can trigger his response if the enemy is defeated.
- **Caldara**
    - Should read: “(Limit once per game.)”
- **Daeron’s Runes**
    - Should read: “**Action**: Draw 2 cards. Then, discard 1 card from your hand.”
- **Dáin Ironfoot**
    - Should have the traits ***Dwarf. Noble.***
- **Déorwine**
    - Should read: “While Déorwine is defending, he gains: “**Response**: Spend 1 Leadership resource to cancel a shadow effect just triggered. Any player may trigger this response.”
- **Desperate Alliance**
    - Should read: “No more than 1 copy of Desperate Alliance can be played each phase.”
    - Omit “(Limit once per phase.)”

    - Q: If I give control of one of my heroes to another player with Desperate Alliance and my other heroes are killed, am I eliminated from the game.
    - A: No. A player is not eliminated from the game unless each of his heroes is killed. The hero chosen by Desperate Alliance is still in play and will return to your control at the end of the phase.
- **Dori**
    - Q: Can I use Dori (OHUH9) to prevent damage from being assigned to Beorn (OHUH5), even though Beorn is immune to player card effects?
    - A: Yes. Dori's **Response** targets the damage being assigned, not the character it is being assigned to, so Beorn's immunity does not factor.
- **Dwarf Pipe**
    - Should read: "**Response**: After a card is discarded from your deck…"
- **Dwarrowdelf Axe**
    - Q: If the effect on Dwarrowdelf Axe destroys an enemy, can I play Foe-hammer?
    - A: No. In order to play Foe-hammer, the attacking character must destroy the enemy. That means dealing enough damage to it with attack strength.
- **Eleanor**
    - The replacement card is also revealed from the encounter deck. Resolve any "When Revealed" effects and keywords on the new card following the standard game rules.
    - Q: If Eleanor is used to cancel the "when revealed" effects of a treachery card, are any surge or doomed keywords on that card also canceled?
    - A: No. Eleanor only cancels the "when revealed" effects of the treachery card. Any surge or doomed keywords on the card resolve before the new (replacement) card is revealed.
- **Elevenses**
    - Q: Can I play Elevenes after resolving a quest since characters are considered to be committed to the quest until the end of the phase?
    - A: No. Elevenses says "Play only after the staging step" which means it is only playable immediately after the staging step ends.
- **Elrond's Councel**
    - Should read: "**Action**: If you control…"
- **Envoy of Pelargir**
    - Should have 1 printed hit point (not 2).
- **Erebor Battle Master**
    - Should read: "Erebor Battle Master gets +1 attack for each other ***Dwarf*** ally you control. (Limit +4 attack.)"
- **Ered Luin Miner**
    - Should read: "**Response**: After Ered Luin Miner is discarded from your deck…"
- **Expecting Mischief**
    - Q: If I play Expecting Mischief and it deals enough damage to the first enemy revealed to destroy it, do I still resolve any "when revealed" or keyword effects on that enemy?
    - A: No. The effect on Expecting Mischief resolves the same way as the effect on Thalin.
- **Expert Treasure-hunter**
    - Should read: "Attach to a hero. Limit 1 per hero."
- **Faramir (lore hero)**
    - Should have the traits ***Gondor. Noble. Ranger.***
- **Feint**
    - Should read: "**Combat Action**: Choose an enemy engaged with a player. That enemy cannot attack that player this phase."
    - Q: When should Feint be played?

    - A: This card should be played any time before resolving step 1 of the target enemy's attack during the combat phase. (Once the act of resolving an enemy's attack begins, it is too late to prevent it from attacking with Feint.)
- **Fili**
    - Q: Can you put Fili into play for free from your hand after you play Kili?
    - A: No. For either character's ability to work, the other character must enter play from your hand.
- **Fortune or Fate**
    - Q: Can I use Fortune or Fate to put Beorn (OHUH5) into play from a player's discard pile, even though he is immune to player card effects?
    - A: Yes. A hero's ability is only active while it is in play. Therefore, Beorn is not immune to player card effects (such as Fortune or Fate) while he is in the discard pile.
- **Háma (hero)**
    - Should read: "(Limit 3 times per game for the group.)"
- **Healing Herbs**
    - Should have the trait ***Item***.
- **Heavy Stroke**
    - Should read: "No more than 1 copy of Heavy Stroke can be played each phase.
    - Omit "(Limit once per phase.)"
- **Helm of Secrecy**
    - Should read: "Swap those heroes, moving all eligible attachments to the hero from your collection." Omit "and damage tokens".
- **Horn of Gondor**
    - Should read: "**Response**: After a character is destroyed, add 1 resource to attached hero's pool."
- **Kili**
    - See "Fili" above.
- **Legacy of Durin**
    - Should read: "**Response**: After you play a ***Dwarf*** character from your hand, exhaust Legacy of Durin to draw 1 card."
- **Legolas (tactics hero)**
    - Q: Does the effect on Legolas place progress tokens on an active location, if there is one?
    - Yes. Always place progress tokens on the active location instead of the quest, unless the ability specifically states to bypass any active location.
    - Q: If there is an active location with the text "Immune to player card effects" when Legolas participates in an attack that destroys an enemy, do I place 2 progress on the active location or the quest?
    - A: No. When Legolas' ability would put progress on the current quest, if there is an active location, it puts progress on that location instead. If that location is immune to player card effects, it ignores Legolas' ability. Therefore, no progress would be placed on the active location or the current quest.
- **Light of Valinor**
    - Q: If I have Light of Valinor attached to a hero I control, can that hero commit to the quest while exhausted?
    - A: No. Characters must be ready and able to exhaust in order to quest, attack, or defend? Card effects that allow a character to perform any of those actions without exhausting do not allow exhausted characters to perform those actions.

- **Love of Tales**
    - Should read: "**Response**: After a ***Song*** card is played, exhaust Love of Tales to add 1 resource…"
- **Master of Lore**
    - Should read: "**Action**: Exhaust Master of Lore to name a card type. Lower the cost for you to play the next Lore card of that type by 1 until the end of the phase (to a minimum of 1)."
- **Narvi's Belt**
    - Should read: "**Action**: Exhaust Narvi's Belt to give attached hero a Leadership, Lore, Tactics, or Spirit icon until the end of the phase."
- **Nori (hero)**
    - Should read: "**Response**: After you play a ***Dwarf*** character from your hand, reduce your threat by 1."
- **O Elbereth! Gilthonial!**
    - Title should read: "A Elbereth! Gilthoniel!"
    - Should read: "**Response**: After a non-unique enemy attacks you…"
- **Out of Sight**
    - Should read: "**Action**: Enemies engaged with you cannot attack you this phase."
- **Out of the Wild**
    - Should read: "Shuffle the encounter deck. Add Out of the Wild to the victory display."
- **Óin**
    - Q: When Óin gains the tactics resource icon from his ability, does that count as the "printed" tactics resource icon?
    - A: No. The "printed" resource icon always refers to the icon that appears in the Resource Icon Space.
- **Protector of Lórien**
    - Should read: "**Action**: Discard a card from your hand to give attached hero +1 defense or +1 willpower until the end of the phase. Limit 3 times per phase."
- **Proud Hunters**
    - Q: Can I use Proud Hunters to add resources to Beorn's (OHUH1) resource pool even though he is immune to player card effects?
    - A: Yes. A hero's resource pool is a separate game element from the hero card, so cards that target Beorn's resource pool (and not Beorn) are not affected by his immunity to player card effects.
- **Quick Strike**
    - Q: Can characters with the ranged keyword participate in an attack declared through the card Quick Strike?
    - A: No. There is no opportunity for other characters to join a Quick Strike attack. One character is exhausted to pay for the cost of Quick Strike, and the effect is that the exhausted character is immediately declared as an attacker against the target enemy. The card's resolution does not allow for a standard declaration step in which other characters can declare.
    - Q: Can I use Quick Strike to declare an attack against an enemy that is immune to player card effects?
    - A: Yes. The effect of Quick Strike targets a character and allows that character to make an attack, therefore the chosen enemy's immunity does not factor.
- **Quickbeam**
    - Should have the uniqueness symbol before the card name.

- **Radagast (hero)**
    - Should read: “While playing a ***Creature*** ally, Radagast gains the printed Leadership, Spirit, and Tactics icons.
- **Ranger Spikes**
    - Q: If there is an unattached Ranger Spikes in the staging area when an enemy with the ambush keyword is revealed from the deck, what happens?
    - A: The Ranger Spikes will attach to that enemy, preventing the players from making the engagement checks for the ambush keyword.
- **Ravens of the Mountain**
    - Should read: “**Action**: Exhaust a hero you control to shuffle the encounter deck and look at its top card…”
- **Reforged**
    - Should read: “**Action**: Choose an ***Item*** attachment…”
- **Sam Gamgee**
    - Q: If I engage more than one enemy with a higher engagement cost than my threat, will the second part of Sam Gamgee’s ability trigger more than once, even if I cannot ready him more than once?
    - A: Yes. Because it does not use the word “then”, Sam’s bonus to attack, defense, and willpower is not dependent on him readying. His readying effect and his bonus to attack, defense, and willpower are two different effects that both have the trigger of engaging an enemy with a higher engagement cost than your threat.
- **Saruman (ally)**
    - Q: If I use the Response effect on Saruman to treat an encounter card guarding an objective as out of play, does that mean I can claim that objective because it is free of encounters?
    - No. When a card is considered to be out of play, each card attached to it is also considered to be out of play. Because objectives with the Guarded keyword are attached to the enemy or location that is guarding it, if that enemy or location is considered to be out of play, the guarded objective is too.
- **Silvan Refugee**
    - Should have the traits ***Silvan. Scout.***
- **Stand and Fight**
    - Stand and Fight cannot return neutral allies from the discard pile, as neutral cards do not belong to “any sphere.”
- **Sword-thain**
    - Q: If I attach Sword-thain to a unique Lore ally (making that ally a hero), does the attached hero have the printed Lore icon?
    - A: Yes. If an ally with a printed sphere icon becomes a hero, that hero is also considered to have that printed sphere.
    - Q: If I use Sneak Attack to put a unique ally into play during the planning phase and attach Sword-thain to that ally, is that ally returned to my hand at the end of the phase?
    - A: No. The ally that entered play with Sneak Attack is no longer an ally because it has Sword-thain attached, and Sneak Attack’s delayed effect no longer affects it.
- **Thalin**
    - When an enemy card is revealed from the encounter deck, Thalin’s ability resolves before any keyword or “When Revealed” card effects on the encounter card.
    - Q: When an encounter card effect instructs me to search the encounter deck and discard pile for an enemy, reveal it, and add it to the staging area during a quest to which Thalin is committed, does he still deal 1 damage to an enemy chosen from the discard pile?

    - A: Yes. Enemies revealed from the encounter deck and discard pile by quest card and encounter card effects are still considered to have been revealed by the encounter deck.
- **Thicket of Spears**
    - Should read: "**Action**: Choose a player. That player's engaged enemies cannot attack that player this phase."
- **Thror's Map**
    - Should read: "**Travel Action**: Discard Thror's Map to choose a location in the staging area."
- **Trained for War**
    - Should read: "**Action**: Until the end of the phase, if the current quest does not have siege, it gains battle."
- **Vilya**
    - Q: When I use the ability on Vilya to play a card, do I still need a resource match?
    - A: No. Playing a card at "no cost" is different from playing a card for "0 cost". A 0 cost card still needs a resource match, however, playing a card at "no cost" removes the need for a resource match.
- **Wandering Took**
    - Should read: "Limit once per round."
    - Q: What happens if Wandering Took changes control between players during combat after being declared as a defender?
    - A: As nothing removes Wandering Took from the combat or from play, it remains declared as a defender against the attack. (The "defending player" does not change, even though control of the defending character has changed.
- **We Are Not Idle**
    - Q: When I play We Are Not Idle and exhaust Bombur (OtD5), do I get 2 resources?
    - A: No. Bombur's ability only works with cards that count the number of ***Dwarf*** characters you control. If you choose to exhaust Bombur with We Are Not Idle, you are still only exhausting 1 ***Dwarf*** character and will therefore only receive 1 resource.
- **Will of the West**
    - Should read: "**Action**: Choose a player. Shuffle that player's discard pile back into his deck. Remove Will of the West from the game."
- **Windfola**
    - Should read: "**Response**: After attached character is removed from the quest, exhaust Windfola to commit *that character* to the quest."
- **Wingfoot**
    - Should read: "If a card of the named type is revealed during this quest phase, exhaust Wingfoot to ready attached hero."
- **Zigil Miner**
    - Should read: "**Action**: Exhaust Zigil Miner and name a number to discard the top 2 cards of your deck. If at least one of those cards has cost equal to the named number, choose a hero you control. For each card that matches the named number, add 1 resource to that hero's resource pool."

REWORKED SETUP - STREAMLINED VERSION

- **Step 1 – Scenario Preparations**
    - 1-1 Choose the scenario you will play. Depending on which Modes are available for the scenario, decide if you are playing in Standard, Easy, Hard, Expert, Nightmare, Campaign, and/or Epic Multiplayer Mode. Place all corresponding Mode cards, if any, on the table. Don't trigger their effects yet. If you are playing Epic Multiplayer Mode, divide the players into teams according to the Epic Multiplayer Card indications. Each team will resolve all the remaining steps and substeps of Setup separately.
    - 1-2 Set up the token bank and assign 1 threat dial to each player.
    - 1-3 Choose the first player and give the first player token to them.
    - 1-4 Build the quest deck arranging the quest cards in sequential order, based on the numbers on the back of each card. Stage 1A should be on top, with the numbers increasing in sequence and moving down the stack. If the scenario includes multiple quest stages with the same number but different letters, arrange those quest cards in alphabetical order. If the scenario includes quest stages with the exact same number and letter, shuffle them randomly together. Some specific scenarios might have you build more than one quest deck. Place the quest deck(s) on the table.
    - 1-5 Build the encounter deck with all the encounter sets shown by the icons on Stage 1A. Some scenarios might instruct you to create (and possibly set aside) more than one encounter deck, in which case follow those specific instructions. If you choose to play in the Core Set Easy Mode, remove the gold-ring cards from the encounter deck. If you are playing in Nightmare Mode, apply the appropriate card changes to the encounter deck card list, as instructed by the Nightmare Card (but don't trigger its Setup effects yet). Place the encounter deck(s) on the table.
    - 1-5-1 If you are playing in Epic Multiplayer Mode, follow the Epic Multiplayer Mode Card Setup instructions.
    - 1-5-2 If you are playing in Campaign Mode, add to the encounter deck all earned Burdens with an encounter card back that are listed in the Campaign Pool (unless the Campaign Card says otherwise).
    - 1-5-3 If the chosen Difficulty Mode card for the scenario has any Setup instructions, resolve them.

- **Step 2 – Player Decks Preparations**
    - Based on the choices made during Setup Step 1, any Campaign Pool, scenario-specific and/or Mode-specific deckbuilding requirements are now active (each following sub-step is resolved by each player in player order, before moving to the next sub-step).
    - 2-1 Choose a contract (optional). If you choose a contract, its deckbuilding requirements are also now active.
    - 2-2 Choose non-conflicting starting heroes.
    - 2-2-1 If you are playing in Campaign Mode, you can change starting heroes at this time, applying the +1 threat increase per hero during substep 3-3 (unless the Campaign Card says otherwise).
    - 2-3 Assemble your deck with the cards available to you and place it on the table. If you decide to use Encounter keyword player cards, those are set aside now.
    - 2-3-1 If you are playing in Campaign Mode (or The Hobbit Saga Expansion) the players can choose any Boons and/or Treasures among those available to them (following to the indications of the Campaign Log and of the Campaign Card if needed) and shuffle the

chosen Boons and/or Treasures into their decks (or into the encounter deck if the Boons have an encounter card back). Boon and/or Treasure cards added to a deck do not count towards that deck's card minimum.

- **Step 3 – Player Setup**
  - (each following sub-step is resolved by each player in player order, before moving to the next sub-step).
  - 3-1 Put your starting heroes into play. Any constant ability they might have is now active. If you are playing The Hobbit or The Lord of the Rings Sagas, the first player determines the Baggins/Fellowship hero they will be playing with and place it on the table. If you are playing The Lord of the Rings Saga and the Ring-Bearer is on the table, the first player attaches The One Ring to the Ring-Bearer.
  - 3-2 If you are playing in the Core Set Easy Mode, add 1 resource of each of your heroes' resource pools.
  - 3-3 Set your starting threat based on your heroes' threat cost. If you are playing in Campaign Mode and you changed heroes in Setup Step 2, or if the Campaign Log instructs you to modify your threat in any way, adjust your threat accordingly (note that only effects that explicitly mention "starting threat", like the contract Messenger of the King will change your actual starting threat).
  - 3-4 If there are Setup effects on your heroes, contracts, or cards in your deck, trigger them all at the same time and you can choose the order they resolve in (note that if multiple players have included The One Ring from A Shadow in the East in their decks only one of them will be able to put The One Ring in play, all the others will remove it from the game).
  - 3-5 Draw your starting hand of 6 cards unless an effect specifically changes this. You can choose to mulligan once your starting hand (and only that, not any other cards added to your hand during Setup) unless an effect specifically changes this.

- **Step 4 – Encounter Setup**
  - 4-1 If there are Setup effects on quest cards, Campaign Cards, Nightmare Cards, or cards in the encounter deck, trigger them all at the same time. The players must resolve them in an order that allows for as many of the effects to be fully resolved as possible (and in the worst order possible for players if relevant). Flip Quest Stage 1 from Side A to Side B (and possibly advance to Stage 2A/2B, resolving that quest card effects too).
    4-1-1 If you are using the XP introduced in the Dream-chaser Campaign you can now spend those to upgrade or level up Boons and Burdens.
  - 4-2 If you are playing in Campaign Mode, shuffle into the player decks the earned Burdens with a player card back listed in the Campaign Pool, according to the indications of the Campaign Log.
  - 4-3 If during any of the previous steps or sub-steps of Setup, you have interacted with the encounter deck in any way, shuffle the encounter deck.

- **Step 5 – End of Setup**
  - 5-1 Some effects can be tied to this step, like the Blue Wizards' Response or the possibility for the players to put into play a player objective. The players as a group may put into play one (and only one) player objective from their collection(s). Add it to the staging area with Side A faceup and trigger its Setup effect. The Setup effect on Side A allows players to "opt in" to the objective before it flips to Side B. After doing so, Setup is now officially and completely over.

LOTR LCG TRICKY RULES

- **Misc. Rules**
  - When playing a card with 0 cost, the player must still have a hero in play that matches the card's color. This is called having a “resource match”.
  - Each player may only optionally engage one enemy during the Encounter Phase.
  - Locations and quest cards can have excess progress tokens on them.
  - Encounter cards with victory points are NOT placed in the discard pile. They go in the Victory Display and are effectively removed from the game.
  - Player cards only account for things that are in play at the time they are played. By contrast, encounter card effects are persistent and recalculate if new cards enter play after they are triggered. (Ex: Take No Notice vs Orc Hunting Party)
  - Discarding is not the same as being destroyed, explored, or played.
  - In order to quest, defend, or attack, a character must be ready even if they have an ability that lets them do the action without exhausting.
  - Abilities that trigger outside of a phase get “charged” to the next phase.
  - Heroes in the discard pile cannot be affected by player cards unless otherwise specified.
  - Events do not enter the discard pile until after they are completely resolved.
  - If cards are discarded from the top of a deck, they go one at a time, not together.
  - A ruling from ALeP: a player is eliminated if they do not control any heroes in play.
- **Timing Rules**
  - When abilities would trigger simultaneously, they are prioritized in this order:
    - Passive > Forced > Response.
    - When > After
  - “Until” effects expire before “at” effects begin.
  - “At” the beginning/end of a phase/round is not considered “in” a phase/round. Abilities triggered at these times are “charged” to the next phase/round.
- **Lexicon**
  - All conditions prior to the word “then” must be completely fulfilled in order to resolve anything after the word “then.”
  - The word “either” gives players a choice. Otherwise, the first option must be taken.
  - When playing solo, you are both the “first player” and “last player. However, there is no “next player” in solo.
  - The word “each” refers to one or more things. It can never be zero.
  - “Limit once per game” actually means “limit once per game per player”.
  - “Gaining” a resource includes “collecting”, “adding”, and “moving”.
  - “Side quests” are not considered to be “quest stages”.
  - A cost of “X” is 0 by default and remains 0 in discard piles since the card text is inactive.
- **Attachment Rules**
  - A character may equip a third restricted attachment but must immediately discard one of its other restricted attachments.
  - After a player plays an attachment, it enters his own play area but can then be equipped to another player's character if desired. (Allies cannot be given to other players unless otherwise stated.)
  - Players retain control of attachments that get attached to encounter cards.
- **Quest Phase Rules**
  - It’s determined first whether the quest was successful, then progress is placed on the active location and quest card simultaneously, then you resolve the active location, then

you resolve the quest card, then the quest phase ends. However, the consensus is that it often makes more sense (such as with Flies and Spiders stage 4B) to place progress on the active location first, then the quest card.
    - Characters are considered committed to the quest until the end of the quest phase.
    - If the encounter deck is ever empty during the quest phase, it gets reshuffled.
    - Progress that would be placed on the quest card is always redirected to the active location first.
- **Enemy Attack Rules**
    - A hero's defense stat is ignored for undefended attacks.
    - Only one character can defend an attack, but multiple characters can join in on an attack against an enemy.
    - *All* damage points are dealt from an attack, even if they exceed the card's hit points.
    - If an enemy makes an additional/immediate attack, all shadow cards on it are discarded before the new attack begins and a new shadow card is dealt.
    - Additional/immediate attacks do not affect an enemies ability to attack you during the normal combat phase framework.
    - Cards moved to different areas after an attack begins do not affect the attack.
- **Player Attack Rules**
    - Each player may declare one attack against each eligible enemy during the combat phase. Usually the only "eligible" enemies are those with which the player is engaged.
    - Ranged characters allow a player to either declare an attack against an enemy engaged with another player, or join in on an attack declared by another player. However, if a player declares an attack with a ranged character against an enemy engaged with another player, only other ranged characters may join in.
- **Encounter Card Rules**
    - "When revealed" effects on side quests cannot be cancelled.
    - "When revealed" effects are resolved before the card is placed in the staging area.
    - All effects on an encounter card must be resolved before revealing another card.
    - Keywords are *not* triggered if a card is simply "added" to the staging area.
    - Cards that remove progress from the quest card don't affect the active location.
- **Shadow Card Rules**
    - If the encounter deck is empty during the Deal Shadow Cards step of the Combat Phase, it does *not* get reshuffled. (Nor any other time outside the quest phase unless otherwise specified.)
    - Shadow cards are dealt first in player order, then enemy threat order highest to lowest.
    - All engaged enemies are dealt shadow cards during the Deal Shadow Cards step even if they can't attack.
    - If an enemy makes an "additional" or "immediate attack", discard any shadow cards from the enemy first.
    - If an enemy enters play or gets engaged during the Combat Phase after the Deal Shadow Cards step and isn't making an "additional" or "immediate attack", it doesn't get dealt a shadow card unless otherwise specified, and just makes a normal attack.
    - Regarding how long the effect of a shadow card persists, the rules aren't clear. But generally speaking, they last until the shadow card is discarded.
    - When an enemy is destroyed, any shadow cards on it are discarded along with the enemy. You choose the order they are placed in the discard pile.
    - If a card is immune to player card effects, unless otherwise stated, shadow cards on that card are NOT immune. So, things like Burning Brand and Staff of Lebethron will work against an enemy such as Smaug.
